V 1 VALUES

see also 'Religion' (R 1)

V 1.1 Value dimensions see also H 3.2, S 2.2.2

V 1.2 Value similarity

V 1.3 Various factors concerning values. . see also P 1.7

V 1.1 - VALUE DIMENSIONS

see also 'Specific Hopes, Aspirations and Goals' (H 3.2), 'Content of Ideal Self-Image' (S 2.2.2)

INSTRUMENTAL VALUES:

18-item inventory (Rokeach Instrumental Values Scale; see Rokeach, 1968)

The values mentioned were rated on a 7-point 'important - unimportant' scale (absolute measure).

They were also ranked in the order of 'importance as guiding principles' in one's life (relative measure).

Since not many differences appeared between the correlations with the first and with the second happiness measure, only correlations with the first instrument are presented here. Correlations obtained from the absolute measure are presented first; those from the ranking procedure second. See also remarks in excerpt (Part II).
